

Job Title	Senior Applications Programmer Analyst	FLSA Status	Exempt
Band	PRO	Probationary Period	12 Months
Zone	9	Job Code	17410

Class Specification – Senior Applications Programmer Analyst

Summary Statement:

The purpose of this position is to develop and modify software application programs of a high degree of complexity and scope, considering the computer equipment capacity and limitations, operational support needs, business requirements, and IT architecture standards. With minimal supervision, designs, codes, tests, debugs, and documents custom-built software programs and interfaces. Provides expert competency to carry out or participate in problem analysis and system design preparatory to development and modification of software programs. May lead and advise other Programmer Analyst staff on operating problems of assigned software programs and provide critical review. May provide technical assistance to lower classifications. Competent to work at the highest technical level of all phases of applications programming activities. Adheres to and reinforces all IT policies, processes, and procedures using the ITIL framework.

Essential Functions	Note: Regular and predictable attendance is an essential function in the performance of this job.
Time % (All below must add to 100%)	Note: Time spent on each essential function will vary based on operational needs and is only intended to be an approximation over the course of a full year.
30%	Defines software system requirements for new application systems or enhancements to existing application systems; provides expertise for possible projects and identifies feasibility and cost requirements, analyzes and identifies hardware and software needs; develops coding of complex software applications; system testing; and user training on new project implementations.
15%	Designs software programs and interfaces based on strategic business needs and operating models; develops and maintains strategic and technology roadmaps; produces models; leads development of implementation; and provides expert consultation in the development of programs.
20%	Supports software systems in production environment; troubleshoots incidents, recommend short and long term fixes, makes fixes to code, and requests the release to production. Responds to production incidents based on prioritization and service level agreements.
20%	Creates and manages database objects to include tables, indexes, procedures, and views; designs and develops the architectural models; provides statistical and analytical analysis of data; and develops, designs, and optimizes queries for applications.
15%	Researches new software engineering tools, patterns, languages, and practices; develops templates using new technology to aid other developers; determines ways new technology can be used to aid in application development; and documents and trains other developers on new technology.

Job Title	Senior Applications Programmer Analyst	FLSA Status	Exempt
